Nikhil113016

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Redux, Next.js, React Native, Tailwind CSS

Design & Prototyping: Figma, UI/UX Principles, Wireframing, Prototyping,

Developer Tools: Git, GitHub, VS Code, Postman,

Databases & Backend Basics: Node.js, Express.js, MongoDB, Prisma ORM, PostgreSQL, REST APIs, Server Actions, WebSockets

Cloud & DevOps: AWS Basics (EC2, S3, CodePipeline, CodeBuild, CodeDeploy), CI/CD Pipelines, Nginx basics

DSA: 125+ Problems solved on LeetCode (Medium & Hard)

Other Skills: Responsive Design, API Integration, Team Coordination, Testing & Debugging, Problem Solving, JWT/OAuth 2.0, Front-End Development, Performance Optimization, Code Review, Technical Documentation, AI Tool Integration (Claude, Gemini)

WORK EXPERIENCE

Full Stack Developer Intern — Navrasa IT Solutions

May 2026 – July 2026

- Building a Logistics Management System and Learning Management System for clients — end to end.
- Reviewed frontend code for correctness, readability, consistency, and adherence to project standards.
- Debugged and resolved UI, state-management, and API integration issues across React applications, using browser DevTools and systematic testing to identify and fix problems.

Software Developer Intern — Labs & Code

30 Oct – 30 Dec 2025

- Redesigned and developed the AI product API Konnect using the MERN stack, integrating MongoDB and AI workflows.
- Collaborated with cross-functional teams to develop and enhance a Learning Management System (LMS) for international clients, delivering scalable features and improving user experience.

PROJECTS

Second Brain

Tech Stack: React • TypeScript • Node.js • Express • MongoDB

- Built responsive, reusable React interfaces with clean component architecture and performance optimization.
- Debugged UI, state-management, and API integration issues using browser DevTools and systematic testing.
- Built RESTful APIs with JWT authentication, MongoDB schemas, and CRUD operations.
- Improved frontend reliability through structured validation, error handling, and consistent UI behavior across user flows.
- Built and maintained reusable components across multiple user flows, improving consistency and maintainability.

Live Demo: second-brain-gm4j.vercel.app

Veda AI

Tech Stack: React • TypeScript • Node.js • Claude API • Gemini API • Redis • BullMQ

- Built an AI-powered study tool with structured response generation using Claude and Gemini
- Implemented Redis caching and BullMQ job queuing for optimized API performance
- Real-time updates via WebSocket
- Deployed on Vercel ensuring fast load times and smooth cross-device experience.

Live Demo: <https://vedaai-assessment-monorepo-web.vercel.app/>

Excalidraw Clone

Tech Stack: React • TypeScript • Node.js • WebSockets • Canvas API • PostgreSQL • Prisma ORM • Turborepo

- Built a real-time collaborative whiteboard app from scratch with multi-user drawing sync.
- Real-time data patterns using WebSocket — handling mid-session joins and delta state broadcasting - PostgreSQL with Prisma ORM for schema design and data management
- Used Canvas API directly for rendering shapes, lines, and freehand drawing without relying on any third-party drawing library.

Live Demo: <https://github.com/Nikhil112004/Exelidraw>

ACHIEVEMENTS & CERTIFICATIONS

- Completed Cohort 3 of 100xDevs by Harkirat Singh, gaining hands-on experience in full-stack web development.
- Attended Gen-AI Workshop at IIT Roorkee, exploring applications of Generative AI in real-world use cases.
- Completed UI/UX Design training from Learn Product .Design, strengthening skills in user research, wireframing, and prototyping.
- Hands-on knowledge of AWS services (EC2, S3, CodePipeline, CodeBuild, CodeDeploy) and CI/CD pipeline setup.
